SUMMARY

Computer Science student with experience building web and mobile applications using Python, React, React Native, Node.js, and PostgreSQL. Interested in AI engineering, automation, software development, and IT operations, with exposure to API integration, database systems, testing, and responsive application development.

AREAS OF EXPERTISE

- Software Development
- API Integration
- Database Integration
- Frontend & Mobile Development
- UI/UX Design
- Product-Focused Development

SKILLS

- **Languages:** JavaScript, TypeScript, C/C++, Python
- **Frontend & Mobile:** React.js, React Native, Flutter, HTML, CSS
- **Backend & APIs:** Node.js, REST APIs, JWT Authentication, API Integration
- **Databases:** Postgresql, Supabase
- **Tools:** Git, Github, Figma

TECHNICAL EXPERIENCE

Tech Access Reskilling with AI (TARA)

- Developed an AI-powered career platform using Python and Flet for resume analysis and job recommendation workflows
- Implemented API integrations, resume processing, and responsive UI features with results generated in approximately 10 seconds per user
- Assisted in testing, feature improvements, and data-focused system enhancements

Focus-Room

- Developed a productivity-focused web application using React and Vite for creating and monitoring study sessions
- Built responsive and interactive frontend interfaces to support collaborative and individual study workflows

Comfee

- Developed a React Native mobile application for discovering nearby coffee shops with search and filtering features
- Implemented user reviews, ratings, and promotional features for business owners and customers
- Worked on backend integration, responsive mobile UI, and usability improvements

EDUCATION

Bachelor of Science in Computer Science

University of Philippines Cebu

Lahug, Cebu City

2023-Present

Science, Technology, Engineering and Mathematics (STEM)

Science and Technology Education Center

Lapu-Lapu City

2023

ADDITIONAL EXPERIENCE

- Can You HackIT - The IBPAP Challenge (Hackathon) 2025
- Overall Head of Komsai Week ByteBlitz Programming Competition 2025 & 2026
- Komsai Week Hackathon 2025
- DOST Technology Application and Promotion Institute CLUSTERICE Finalist 2024
